

CHAUVEL
INDUSTRIAL SERVICES
EXCEEDING EXPECTATIONS

A photograph of an industrial setting. In the foreground, a yellow hard hat with a red label is resting on a metal surface. In the background, several workers in orange safety vests are visible, though they are out of focus. The lighting is warm, suggesting an indoor industrial environment.

Capability Statement

QUALITY SERVICE | RELIABLE | RESOURCEFUL | INDUSTRY LEADERS

Overview

It is the policy of Chauvel to provide efficient, prompt and reliable services to meet the requirements of customers every time.

Chauvel prides our self on professionalism in every aspect of our business and our Policy and Procedures apply to all phases of the life cycle of our operations. Wherever we operate we want to do so with integrity - making the right decisions and doing things the right way.

Through innovation our goals are to exceed our customer's expectations in all areas of our business.

- Develop and maintain close working relationships with our clients that are built on professionalism, trust and confidentiality.
- Always conduct business to ensure the company remains in a position of zero conflict of interest reducing undue pressure.
- Continually improve in all areas of our business and be open to positive change.
- Have every employee share in our commitment to all our Policies and Business systems.
- Provide adequate training to ensure the job is carried out by comprehensively qualified staff.
- Consistently deliver high quality services on all challenging projects.
- Strive to continuously improve our performance by establishing objectives and targets, carrying out regular reviews and audits, and acting quickly on non-conformances and incidents.
- Measure and Monitor our performance against our quality objectives regularly, consistently, and honestly using the results to develop effective measures aimed at business improvement.

Evidence of our commitment to develop and continually improve the management system is through reviewing the management objectives, changing them as required, regular review meetings, conducting internal audits, regular inspections of products, and implementing corrective and preventative actions.

This is OUR promise to YOU

Health and Safety Objectives

Chauvel adheres to strict, specialised policies and procedures to ensure public and personal safety at all times.

- Compliance with all statutory requirements as a minimum standard
- Providing appropriate OH&S training for all employees
- Training employees to be aware of their responsibilities
- Using continuous improvement principles to achieve best practice standards
- Competent management of change in our plant, systems, or products
- Appropriate rehabilitation for all ill or injured employees, on and off the job
- Working safely as a “condition of employment”

Reducing Risk

We are focused on reducing risk and preventing injury and illness amongst our employees, sub-contractors and community.

- Forklift

Abrasive Blasting - and Protective Paint

Abrasive blasting strips imperfections, rust, paint and contaminants from the surface of your products.

This process prepares the surface for protective coating to be applied.

We have a dedicated Gold Level Blast and Paint Team.
Trained in Mobile and Booth Services.

Industrial Tiling

Refurbishment of equipment can not only extend the life of your assets. It is a cost effective way to maintain your infrastructure.

- Our Chauvel Team can remove your Cyclones & Chutes as part of a planned Shutdown, or as requested.
- We are able to transport the product to one of our workshops, and back to you onsite.
- We use only the highest Quality materials and Workmanship.
- Our Quality Control Measures ensure the work will endure the harsh environments, they are required to work in.

Chauvel Piping - Piping Supply

We can supply a range of Piping Products to suit your Project and Repair Requirements.

- Poly Pipe
- Basalt Pipe
- Alumina Ceramic Pipes
- Stainless Piping
- Carbon Steel Piping
- Silicon Carbide Pipes

Vapour Blasting

Cleaning and Degreasing

Vapour Blasting uses compressed air to blast a mixture of glass beads and water simultaneously to clean and degrease the surface of your products.

Our Non-abrasive technique will give a smooth, satin like finish to your products surface.

This process can be used for a range of materials, and utilised across a range of industries including:

Automotive | Motorcycle | Marine | Aviation

Surfaces that can benefit from Vapour Blasting include:

- | | | |
|-------------|--------|-----------|
| • Aluminium | • Lead | • Brass |
| • Copper | • Tin | • Plastic |
| • Titanium | • Zinc | • Rubber |

Chauvel Industrial Services is an experienced and qualified team of personnel, who have been supplying the Heavy Industry with maintenance and facility services since 1997.

Our promise to you:
24 hours a day, 7 days a week Emergency Service, Support and Maintenance.

FEEDBACK

Communication is important to us, both internally & externally.

We are constantly looking at ways to improve & value all feedback
